

Exposure to mold in orlando and central florida area has several symptoms. Mold can and does cause serious health problems in many people.

Here are the More Common Symptoms:

1. Skin Rash - You can develop redness in your skin simply from inhaling the fumes from the mold.
2. Eye Irritation - Mold can cause both redness and watering of the eyes.
3. Headaches - Breathing in mold can cause headaches in some people. This is especially true of people who suffer with migraines.
4. Feeling Tired - Feeling tired for several days in a row
5. Sore Throat - Experiencing a raw feeling when swallowing or hoarseness when speaking
6. Shortness of Breath -Breathing in mold spores can cause respiratory difficulties in some people
7. Runny Noses - If you are constantly reaching for a tissue to catch your runny nose this can also be a strong symptom of mold exposure.
